

# PAPERLESS COVID - 19 COMPLIANCE MANAGEMENT SYSTEM

All companies are required to implement detailed health and safety protocols to protect their employees and visitors from the spread of COVID-19 in the workplace. Each business owner wants this done as efficiently and as safely as possible while trying to ensure earning revenue is also a priority. The implementation of these protocols and the required data records can be onerous and costly. One Digital Media solves these issues with our mobile forms app.

Our application can be downloaded onto a handheld device and all completed regulation documentation is automatically stored in the cloud such as:

- Health declaration – every person entering the workplace is required to complete a health declaration.
- Geo-tagging - submissions can be tagged with location data
- Temperature check – an appointed person has to check and record staff temperatures.
- Building Sanitisation check – high traffic areas and surfaces to be cleaned regularly and records kept.

At a very low cost - your office or place of business will meet with Government regulations and the information is available online at all times. The system also ensures the COVID-19 Compliance Officer or Manager at site can check if policies are being followed. Online Power BI data visualisation provides 'live' data feeds from all your sites.

## THIS APP SOLVES FIVE UNIVERSAL PROBLEMS

1. Cost effective implementation of COVID-19 policies.
2. Efficient management of data and quick access to historical data.
3. Availability of real-time, reliable and accurate data if infection is detected.
4. Full data compliance of policies.
5. Quick mitigation of risk and therefore continued operation of your company.

### How it works

#### Visitor / Staff

Sign in using the App and geo-tag location

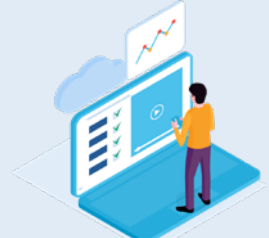

Check temperature and fill out declaration

#### Office Management

Check the office to ensure protocols are being followed

Compliance Officer or Manager checks the dashboard

### Pricing Guidelines

1. Other market related systems could cost R5 000.00 to set up without taking into consideration the time it takes to get these systems in place.
2. Other companies are charging operational fees of up to R 2 500.00.
3. Our system runs on all phone operating systems, allowing you to have complete use and access from your average smartphone. OPEX cost reduction is the goal for most businesses and this is why this platform is perfect for you.

### Cost

**Setup Fee** **R900**

**Monthly Fee\*** **R200**

\*Starting price dependent on number of licenses needed for size and scale of business
